General comments about field practicals in civil & environmental engineering courses

The activity was structured to ensure maximum learning

The field trip was an important component of the course

The lecturer provided appropriate on-site guidance during the field trip

Field work improved my ability to work in group

Field trip contributed to group bonding

The lecturer communicated enthusiasm for the material

I have learned to think more critically

I like the self-paced approach

The field trip/work plays a vital role to comprehend real-world engineering

The course(s) was (were) structured to help me to improve my learning skills

The field experience has helped me to develop the ability to work in a professional environment

I like the self-paced approach

All things considered, do you think that field works and site visits are an important component of the curriculum?
